

CO2 Systems Co., Ltd.

Product and technology information

The multifunctional mixing apparatus that our company developed

- (1) brings about a revolution in infection and sanitation control with safe and high-performance apparatus for producing sterilizing water (patented),
- (2) makes use of a carbonated spring that dilates blood vessels to prevent illness before symptoms appear and encourages a greater awareness of our health, and
- (3) achieves effective use with various gases in the multifunctional mixing apparatus (patent applied for).

Company Introduction

We develop new products on the basis of multifunctional mixing apparatus. The apparatus for producing weak hypochlorous acid sterilizing water has now been commercialized after two years of development. The apparatus has specifications unlike those of other companies such that it needs no power, is small, and is the bag interchangeable type. We will advertise this innovative product to a wide range of industries that need countermeasures against infection, such as care facilities, the food service industry, hotels, public facilities, and medical institutions. We will increase sales with this product.

Others (Comments)

[Representative's message]

We believe that it is more important to prevent illness in advance than to receive medical treatment after illness in terms of the improvement of current medical care and health care. A highly concentrated carbonated spring is considered effective against "problems with peripheral blood vessels" that causes many diseases. The highly concentrated carbonated spring is very useful for dilating blood vessels. We want to help you solve problems of medical care, health, and beauty with the spread of the apparatus for producing a highly concentrated artificial carbonated spring, "CO2SPA," that our company has developed.

Company Information

Industry Environment · Medical · Beauty · Agriculture

Corporate name CO2 Systems Co., Ltd.

Representative KEIJI YAMAZAKI

Capital 10,000,000 JPY

Number of Employees 4

Person In Charge KEIJI YAMAZAKI

Head office 702, 7th Fl., Kanagawa Chushoukigyou Center Bldg.5-80, Onoecho, Naka-ku, Yokohama

Main phone number +81-45-264-9301
