

# Fuji Molecular Planning Co., Ltd.

## Product and technology information

Fuji Molecular Planning Co.,Ltd. (FMP) has three key technologies:

1. New synthesis method of functional RNA derivatives including cyclic-di-GMP
2. EMARS reagent
3. A compound with new scaffold which can control factors of orphan disease

## Company Introduction

FMP provides advanced technologies of fine organic synthesis of molecules and reagent with complexed structures based on wide knowledge of organic chemistry and high synthesis skills. Cooperative partners to promote and implement joint research, to drive process development and to co-develop pharmaceutical products are welcome. We also welcome Sales partners of our products and service.
