

Goken NIHON, Co. LTD.

Product and technology information

Goken's design and engineering services encompass all aspects of product development from initial product planning to mass production. We support mechanical, electrical and electronic systems development, covering metal, plastic, composite, and electronic components.

Our language and business services support our client's product development process by providing technical translation and interpretation, purchasing, analysis and costing, and general administration.

Our technology services support our client's PLM, Automation, Virtual Reality/Augmented Reality, and Training needs.

Company Introduction

- Goken, a North America based engineering and technology company was founded in 2004 by two former Honda associates with the goal of "Creating Something Different... " Something different for our clients, communities, and our associates.
- Our culture builds trust that fosters innovation.
Our associates are committed to helping our clients build better products.
- We offer our associates a career path that begins with training necessary to succeed on the first day, and on-going training to help them reach their dreams.

Others (Comments)

Goken has created an organization focused on helping manufacturing companies that work locally and globally.

We are able to bridge cultural gaps and provide a follow-the-sun global solution. Many of our projects are a collaboration between our USA and NIHON workforce.

This is one reason Goken has been recognized as one of the top 5,000 fastest growing private companies for two consecutive years by INC. Magazine.
