

# Taiyo Kinzoku Industry Co.,Ltd

## Product and technology information

- Flame hardening: wheels, gears, cams, injection molding machine components, construction equipment components, and other mechanical components
- Induction hardening: automotive components, injection molding machine components, printing machine components, robot components, and other common mechanical components
- Plasma (ion) nitriding: automotive components, machine tool components, measuring device components, and other precision machine components
- We provide heat treatment for metal products ranging from small to large sizes in various fields, for everything from prototypes to mass production items. This includes heat treatment of mass produced automotive components, heat treatment of long components such as in injection molding equipment, and low-deformation surface hardening treatment of large wheels and finished products in steel plants and shipyards.

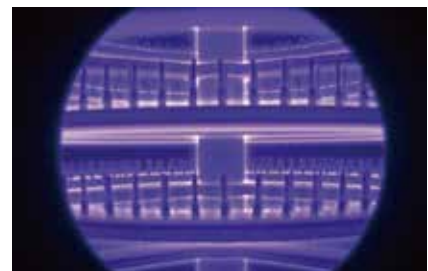

## Company Introduction

For over 45 years, Taiyo Kinzoku Industry has dedicated itself to honing its skills as a specialty provider of heat treatment processing. Similar to not being able to evaluate the sharpness of a blade by appearance, the quality of heat treatment also cannot be evaluated by appearance. But heat treatment plays an important role in product quality. While carrying on traditional artisan technology, Taiyo Kinzoku Industry genuinely strives to become trusted as a provider of this technology that cannot be discerned visually.

## Others (Comments)

Facility manager Nobumi Kamimura was selected as "Contemporary Master Craftsman" in November 2009.

As for skill certifications, we have on staff one specialty metal heat treatment processing technician, four first-class metal heat treatment technicians, three second-class metal heat treatment technicians, and two third-class heat treatment technicians.

## Company Information

**Industry** Manufacturing Industry

**Corporate name** Taiyo Kinzoku Industry Co.,Ltd

**Representative** Seigo Harada

**Capital** 50000000

**Number of Employees** 15

**Person In Charge** Seigo Harada

**Head office** 2-15-1, Minowacho, Kohoku-ku Yokohama-shi, Kanagawa, 223-0051, Japan

**Main phone number** +81-45-563-2207

**Web address** <http://www.taiyo.cc>

**Established date** February 9th,1970

**Acquired Certification** ISO9001:2015 JQA-QMA11135

Toshiba Corporation Power System Company Keihin Plant (Nuclear PVS RK0872129)

**Main Clients** Toshiba Power Systems, Keihin Office, Toyota Motor, Nissan Motor, Hitachi Industries, Hitachi Tool Engineering, Hitachi Metals Techno, Sumitomo Heavy Industries, JFE Mechanical, Dai-ichi High Frequency, Japan Electronics Industry, Otsuka Hi-Tech, Plus 340 other companies

**E-mail** [info@taiyo.cc](mailto:info@taiyo.cc)
