

Unimation System Inc.

Product and technology information

River flood early warning system that can continuously monitor water levels.

warning signals are instantaneously released by rotating warning lights, sirens and speakers.

The system is highly autonomous and can be installed on a stand-alone basis.

This makes the product effective in small and medium sized rivers and irrigation channels that are physically located close to residential and commercial areas.

Furthermore, the use of multiple units installed at multiple locations allows coverage of broader areas.

Various designs can be adopted to flexibly suit the site location, condition, and purpose.

Solar panels and other independent power sources can be used to counter blackouts, and various optional features such as inundation sensors and electrical message boards can be added.

Company Information

Industry Disaster prevention equipment

Corporate name Unimation System Inc.

Representative CEO Yukihiro Itoh

Capital 16,500,000 JPY

Person In Charge Takeshi Itoh

Head office 11-8 Nishi-cho, Isogo-ku Yokohama-city kanagawa 235-0007 Japan

Main phone number +81-45-751-5755
