

Furukawa Electric Industrial Technology Inc.

Product and technology information

Manufacturing parts and accessories for Electric Vehicles, inspection machines for semiconductors, chassis, panels and brackets and assembly of different types of machines for industrial use. Also, we design prototype for various IoT hardware and platform applications.

Company Introduction

Our services are divided into three different divisions and they include prototyping, metal parts manufacturing and chemical product production.

1. Prototyping process and development procedures.
2. Metal parts manufacturing process.
3. Chemical products manufacturing process.

Also, our comprehensive network of SCM solutions can seamlessly source any material you want to implement in your product.

Others (Comments)

Representative's message

We are planning to diversify our business portfolio into the robotics and IoT device markets. We also want to support new business development, sustainability, venture capital companies, and start-ups within the Japanese market and abroad.

Our Services

1. Consulting

Set up a consultation appointment to explore your ideas to materialize them into functional products.

2. Design-Prototyping

We provide customized solutions based on your budget. Our flexible team can match what you are looking for in designing your product.

3. Procurement

Our comprehensive network of SCM solutions can seamlessly provide any material you want to source or implement in your product.

4. Sub Assembly

While you focus on designing we focus on production so you don't have to.

5. Delivery

We have global logistical solutions that meet your transportation needs; no matter if its across the street or in remote areas around the world.

Company Information

Industry Automotives, semiconductors, communication devices, aerospace, computers, robotics, etc.

Corporate name Furukawa Electric Industrial Technology Inc.

Representative Tomotake Furukawa

Capital 10,000,000JPY

Number of Employees 12

Person In Charge Tomotake Furukawa

Head office Yokohama, Kanagawa

Main phone number +81-45-548-6071

Web address <http://feit.co.jp/>

Established date 1941 August

Acquired Certification ISO9001

Main Clients Ricoh, NEC, Samsung and Mitsubishi, Panasonic, etc.
