

## Product and technology information

- Water treatment devices that functionalize water passing through a powerful magnetic field.
- Magnetic water treatment protects against rust and grime, and is highly effective in addressing residential, office or industrial related plumbing issues such as corrosion, scale deposits and strong odors. It is also effective against algae formation in areas such as ponds and irrigation waterways.
- There is no need for external energy sources such as electricity or gas, and no expendable supplies are required. Extremely durable and reliable.
- These devices are designed for energy efficiency with minimal environmental impact.
- The systems contribute to the sustainability and preservation of natural water resources, as the devices' effects on tap water persist until it becomes wastewater.

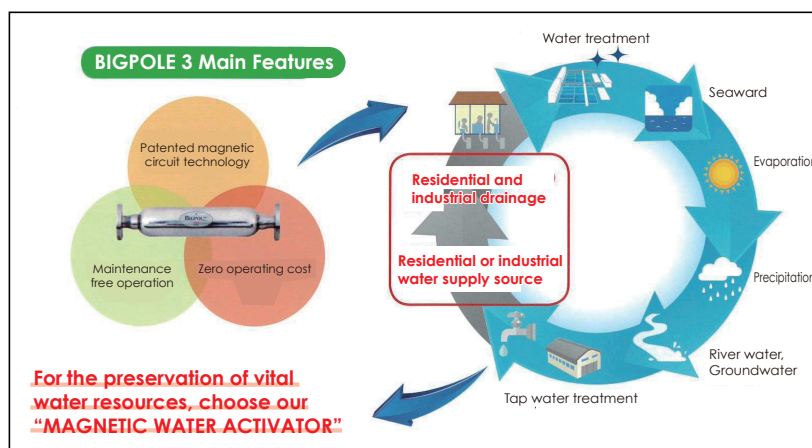

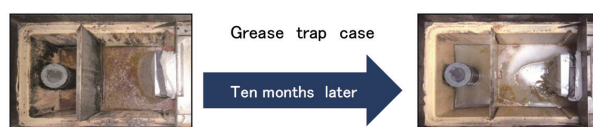

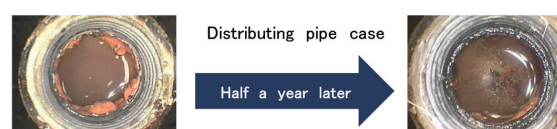

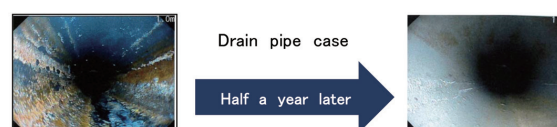

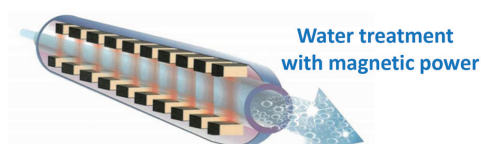

## Company Introduction

Our philosophy: "To Maintain the Earth's Beauty for Future Generations."

Since its founding, our company has researched and developed green technology and devices that benefit the Earth and its people in order to achieve a more environmentally sustainable society.

## Market sectors

Residential, Office, Industrial, Retail, Agriculture, Livestock, etc. All sectors utilizing water supplies.

## Company Information

**Corporate name** HUMAN R&D Co.,Ltd.

**Representative** Oike Yoshimasa

**Capital** 100 million yen

**Number of Employees** 9

**Person In Charge** Ida Akira

**Head office** Yokohama-Kanazawa High-Tech Center Bldg. 15F, 1-1-1, Fukuura, Kanazawa-ku, Yokohama city, 236-0004, Japan

**Main phone number** +81-45-788-8228

**Web address** <http://www.hrd.ne.jp/>

**Established date** 11th December 1991
