# Katano Kogyo Co., Ltd

### Product and technology information

for example, one of our informations Intellectual Property (Patent No.4551977)

Multiplex Ring Discharge Technology

Multi-Shape design of receiving electorode enables simultaneous multiple discharge, resulting in the storongest ion flow compared to other types with identical diameter and identical voltage.

#### **Company Introduction**

All the basic technologies are researched and developed by our representatives in house.

Product development is done in cooperation with one company in China.

Owns patented technology to generate ionic wind efficiently in Japan, some Asian Country, and some EC countries.

While manufacturing and selling products equipped with this technology, we have a technology alliance.

## Others (Comments)

[Company strength]

Using this technology, it is possible to deodorize various odors that are problems in hospitals and nursing homes by eliminating bacteria without using chemicals.

\* Currently used in about 4000 facilities including Japanese national hospitals, private hospitals and nursing homes.

[Company structure for market development]

Using this technology, we are seeking partners for module supply and installation in our products.

本気で消臭したい方!
