

Kyoritsu Metal Industry Co., Ltd.

Product and technology information

1. Stainless steel wire (0.010mm~0.500mm)
Applications: Springs, Guidewires, Needles etc.
2. Phosphor bronze wire (0.100mm~0.200mm)
Applications: Springs, Contact probes etc.
3. Piano wire (0.010mm~0.300mm)
Applications: Springs, Contact probes, Ferrules, Capillaries etc.

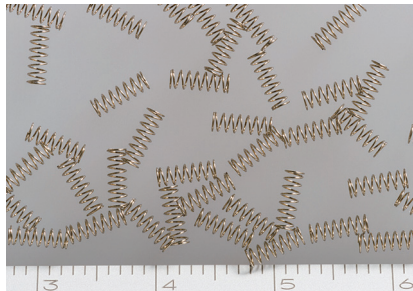

Company Introduction

Established in 1961, we have developed ultra-precise wire processing technologies capable of achieving perfectly round shape within diameters deviation of $\pm 0.1 \mu\text{m}$ (0.0001mm).

Our wires have been applied to vehicles, office automation appliances, electric appliances and medical instruments. Kyoritsu's wires are highly regarded all over the world as the materials which support the society.

Company strength

Faster than anyone else - ship out our wires within 1 month.
Accept orders for small quantity - orders less than 1kg are accepted.
Make wire surface smooth - our wires are used for medical equipment because of its smooth surface.

Company Information

Industry Manufacturing of ultra-fine wires

Corporate name Kyoritsu Metal Industry Co., Ltd.

Representative Matsumura Yoichi

Capital 10,000,000JPY

Number of Employees 21

Person In Charge Matsumura Kohei

Head office 2-8-23, Fukuura, Kanazawaku, Yokohama, Kanagawa 2360004 JAPAN

Main phone number +81-45-7883081

Web address <https://www.kyoritsu-metal.co.jp/en/>

Established date 1961.7

Acquired Certification ISO9001:2015

Main Clients Nippon Steel SG Wire Group
