

Product and technology information

One Will Flexible Bag

It is producing at overseas 10 plants (as of 2016)

Various proposals according to customer's application and budget are possible.

Also, not only the sale, but also the disposal of the used Flexible bag, we are available at the recycling division.

Keisoukun™ Gaina™

Ceramic-based coating that repels dust and dirt

Acts as radiant barrier for walls and exteriors

Noise deadening function makes spaces quieter

Generates negative ions which can resolve odors and freshen air

Incombustible and releases no toxic fumes when heated

Extremely effective against ultraviolet (UV) light

2-3 times more durable than regular paint (15 year guarantee)

Available in over 280 colors

Keisoukun™ Plaster

Diatomaceous earth-based plaster containing natural, non-toxic aggregates and binders

Absorbs moisture when air is humid; releases moisture when air is dry

Tested as anti-mold and effective against E. coli and Staph.

Neutralizes odors and over 50 types of volatile organic compounds

Incombustible and releases no toxic fumes when heated

Available in 3 grades and in over 200 colors

Keisoukun™ Paint

Diatomaceous earth-based paint containing natural, nontoxic pigments and binders

Applies as easily as standard paints

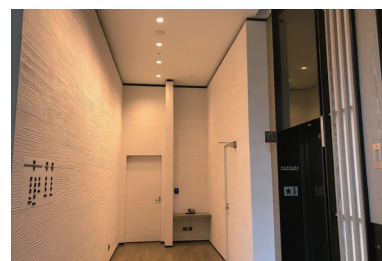

Same functions and features as Keisoukun™ Plaster

5star hotel, Lobby area, right & left wall are made in Keisoukun

5star hotel, check-in counter by Keisoukun

5star hotel, near to elevator hall from B2 parking floor by Keisoukun
