"Based on the Standard Tables of Food Composition in Japan 2015"

- Integrated control of menu preparation, meal count entry, order processing, and document preparation!
- Thanks to its menu preparation screen that is committed to ease of use, it boasts the top share among nationwide school lunch systems!!
- Can register of 5 schools. Because it can draw up 10 kinds of menu for each school, it can be used to create allergy-conscious menus and others.

We have packed it with many new functions requested by our customers!

The Calorie Make Series features an easy-to-use menu preparation screen!

The newest edition has even more menu preparation functions to support a smooth process all the way to order processing.

Menu distribution among "Calorie Make 7" users.

This is an extremely convenient function.

Drafting menu

Preparing menu

The new function, "setting serving amount per person by each grade" lets you order even more efficiently!

Menu planning

Prepares a menu in calendar form while confirming the event schedule.
Can reuse an entire month of past menus.

You can freely select the types and sequence of nutritional values to be displayed.

Users of the same version, Calorie Make 7, can distribute data even more efficiently!

Order processing functions are also upgraded, and new allergy-related forms have been added as part of an overall revision of forms!

We have prepared sample forms and other detailed documents. Just let us know which you would like to see.

Output forms

Almost all of these forms can be output in Excel format.

Distribution use menu lists, order forms, food inspection lists, weekly reports, kitchen assignment tables, illustrated menu lists, monthly nutrition reports, allergy-conscious food use menu lists, PFC graphs, allergy use removal check lists.
