

Yokohama Denshi Co., Ltd.

We, Yokohama Denshi Co., Ltd., are proud of best performance and achievement of Monodzukuri (industrial capabilities) more than 45 year powered by electric and electronics unique technology.

Uncompromising Monodzukuri Technology from the company foundation make us proud of challenge spirit with not only integration from designing to manufacturing of control unit, but also own development products such as Intrusion prevention system of vehicle, Thermal conductivity measuring devices, Speed Mater etc.

Among those, Thermal conductivity measuring devices are adopted by specific Inspection institute as standard equipment powered by Yokohama Denshi "Only-One" exclusive technology.

Intrusion prevention system raising bollard "ONI" is our Yokohama Denshi registered trade mark.

Unique Technology (Outstanding technique and product)

We accomplish the production from substrate, housing, control unit, up to equipment devises powered by our integrated development and designing capability, after interview of designer's idea and concept.

Our Unique technology: Control and inspection technology and its products related with electric and electronics, and securities (prevention) technology and its products.

Only-One (exclusive) technology: Thermal conductivity measuring devices by GHP method is our exclusive products which nobody can produce in Japan.

(Main business line/Main products)

Control unit design and production/PLC control unit/Microcomputer control unit/PC control unit

Intrusion prevention system of vehicle design/production/installment/sales

Thermal conductivity measuring devices design/production/installment/sales

Control unit design/production/implementation (hand mounting/implementation by mounting devise)

(Our strong market and field)

Electronics field (control unit related etc.) and Automobile/Railway (Environment/Energy (Analysis-Measurement-Control system etc.)

Disaster prevention/Safety-Equipment/Construction (Security-Analysis-Measurement-Control etc.)

(Our development from now on)

Industry-Academia Collaboration, and IOT business field development

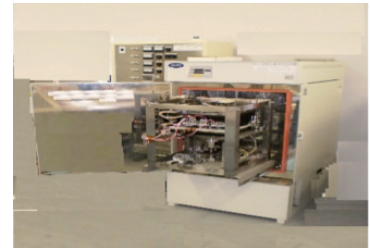

(Our global business)

Exhibit in the domestic and overseas Exhibition

Auto CAD 3 units, Withstand Voltage Tester 1 unit, Insulation Resistance Tester 1 unit, Power High Tester 1 unit, Soldering Device 20 units, Crimping Tool 30 etc.

Intrusion prevention system Rising Bollard "ONI"

Thermal conductivity measuring devices(GHP method)

Control Unit

Company Information

Corporate name Yokohama Denshi Co., Ltd.

Representative Kazuhiro Kanda

Capital 10 Million Yen

Number of Employees 10 Employments

Person In Charge Yasushi Ogawa,

Head office 240-0044 937-2 Bukou-Cho, Hodogaya-Ku, Yokohama City

Main phone number +81-45-334-0681

Web address <http://www.y-denshi.com>

Acquired Certification Acquisition of ISO9001:2008 certificate

Main Clients Automobile related enterprises, Major Electric Appliance makers,
Major Textile Makers, Major Construction Material Makers,
Private Company Research Institute
